About Me

Hi, I'm Rodrigo, a 30-year-old IT professional with around 6 years of experience.

I specialize in problem-solving, task delegation, and workflow management for small development teams.

I have a strong passion for learning, always seeking new challenges that push me out of my comfort zone. I thrive in dynamic environments and enjoy leveraging my skills to achieve successful results.

I'm excited about the opportunity to bring my experience and energy to your team!

Skills

Web Design & Layout

Advanced knowledge of HTML, CSS, and Tailwind CSS.

Experienced in designing accessible and responsive interfaces, applying modern UI/UX design principles, and optimizing for SEO.

Frontend Frameworks

High proficiency in JavaScript and frameworks such as Vue.js. Practical knowledge and some experience with React. Work with Vite, Pinia, and Tailwind.

Backend / Databases

Basic knowledge of Node.js and REST APIs. Experience integrating services and structuring simple business logic.

Basic knowledge of SQL databases and NoSQL with Firebase.

Experience connecting frontends with APIs in real time using WebSockets.

Cloud & DevOps

Experience using Netlify and Vercel for personal deployments.

Work experience with Azure and AWS.

Agile Methodologies & Tools

Daily work with agile methodologies such as Scrum/Kanban.

Use of Jira, Azure, GitHub, Storybook for version control and component documentation.

Soft Skills

Strong communication skills, teamwork, problem-solving, and self-learning ability.

Work Experience

KIU System Solutions

Front End Developer - May 2024 – July 2025

Designed and improved interfaces and user experiences for multiple aviation-related platforms, including package tracking systems and an AI-powered chatbot. Worked closely with design teams to create visually appealing and easy-to-use interfaces. Contributed to the company's design system using Storybook, creating reusable components and maintaining design consistency following industry standards.

Striano

Front End Developer | April 2022 - April 2024

Led the front-end development of various projects, focusing on designing and improving UI/UX experiences. Developed scalable platforms with clean, maintainable code while applying best practices to ensure long-term sustainability. Used strong problem-solving skills to handle external projects, quickly understanding requirements and implementing improvements to adapt to changing client needs.

Consensus

Full Stack Developer - June 2019 - March 2022

My first professional role, working alongside a great team. Maintained a banking web platform and contributed to new innovations such as a mobile wallet and an electronic invoicing system using Vue.js and .NET.
